Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Cook et al 20040045616.

Cook discloses a method of sealing a tubular 210 in a wellbore. The tubular member is deformed in a manner such that the tubular member assumes the shape of a non-uniform surrounding device. As to claims 21-24, paragraph 110 teaches that the sealing means can be either a ductile metal such as lead or an elastomer.

Claims 25-30,32 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Wright 1339641.

Wright discloses a method of profiling pipe in a wellbore. Expansion devices 21 are positioned at the desired location within the pipe and then caused to radially expand to cut the pipe. It is considered inherent that the cutting means forms a profile in the tubular prior to cutting the tubular. As to claim 26, the profile is in the form of an annular recess. As to claim 27, the tubing is deformed by rolling expansion. As to claims 28

and 29, the tubing is deformed by plastic deformation. As to claim 30, means 21 is in the form of a roller. As to claims 32 and 33, a plurality of expander members are provided and rotated to form the profile.

Allowable Subject Matter

Claim 31 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 1/11/06 have been fully considered but they are not persuasive. With respect to Cook, applicant argues that the outer surface of Cook is uniform. No casing or tubing are uniform at the microscopic level, they are all uniform. Unless applicant positively claims the surrounding surface having undulations or some specific non-uniform surface, Cook will be used against non-uniform. The rejections based on Fisk have been withdrawn in view of applicant's arguments.
